

PLMR&D Bengaluru

Product Lifecycle Management Research and Development

PLMR&D ensures smooth knowledge transfer between the product lifecycle phases and R&D.

According to Michael Grieves: "Product Lifecycle Management (PLM) is an integrated, information driven approach comprised on people, processes/practices, and technology to all aspects of a product's life, from its design through manufacture, deployment and maintenance – culminating in the product's removal from service and final disposal.

PLM is an extended enterprise solution ... " ...PLM is a business initiative, rather than an application or even a set of applications." "PLM, ...It's a business approach, a strategy to solve the problem of managing the complete information set that defines a product" "PLM : A business strategy that helps companies share product data, apply common processes, and leverage corporate knowledge..."
